Academic Projects:

➤ **Title : Data bucket list using AWS**

Description:

The Data Bucket List Management System is a comprehensive web-based application designed to replace manual record-keeping methods. This project aims to provide users with a convenient and efficient way to manage and access data bucket lists. Users can easily generate, update, and retrieve data bucket lists through the web application, reducing manual effort and enabling remote data management.

➤ **Title : Hotel Management System (Mini project)**

Description:

This system offers a number of choices, like reserving a room, reviewing customer information, changing or removing any client, and seeing all rooms that have been assigned. Two key C++ concepts—classes and file handling—are used in the project's development.
